## Air Conditioner Mobile

### ROOF AND UNDER-BENCH AIR CONDITIONERS FROM DOMETIC NOT ONLY KEEP COOL, BUT ALSO REDUCE HUMIDITY. THIS ENSURES THE CLIMATE IS PERFECT!

Whether at home or in a leisure vehicle, our comfort not only depends on temperature – humidity also plays a decisive role. If the humidity tends to be low, we can still tolerate temperatures which are very high. When the humidity rises, we really start suffering from the heat problems with circulation and with sleeping are the inevitable result.

A good air conditioner for a mobile home not only needs to cool down the air in the room; it should also dehumidify it at the same time.

To ensure that both – cooling and dehumidification – work perfectly even at high ambient temperatures, the air conditioners from Dometic function using high-performance compressor technology. We promise that one of our seven air conditioning models will satisfy your personal idea of a perfect on-board climate!

#### ROOF AIR CONDITIONERS

Roof air conditioners offer a space-saving installation option. They operate highly efficiently, based on nature's own example: rising, warm air is drawn in and cooled down, while cool air sinks down naturally. Dometic roof air conditioners were designed for standard roof openings (40 x 40 cm). Normally, air conditioners simply replace the existing roof window.

#### ROOF AIR CONDITIONERS WITH WINDOW

This air conditioner, which is the only one of its type worldwide, does not force you to sacrifice the roof window – quite the contrary. The Dometic FreshLight models feature a window which is already built into the air conditioning unit. The result is perfect temperatures on board a caravan or motorhome with natural light still coming in from above.

#### UNDER-BENCH AIR CONDITIONER

Under-bench air conditioners give you the benefit that the roof load, outside dimensions and centre of gravity of your motorhome or caravan are not affected. Our FreshWell 3000 model distributes the air through three outlets, which can be placed inside your vehicle as required. Featuring advanced heat pump technology, this air conditioner can also be used for heating.

Included in all FreshJet models

## MINI HEKI STYLE AND MINI HEKI S

For standard  
roof openings  
400 x 400 mm

Every vehicle instantly seems so much more inviting! Despite their compact standard sizes, the Mini Hekis provide the optimum amount of light. Both models feature a lightly tinted, aerodynamically formed glass dome. The Heki Style even features double glazing, and can be opened in three different positions (incl. poor weather position). The single-glazed Heki S can be opened to all sides using operating handles. The Mini Hekis are equipped with a single pleated darkening screen and a fly screen.

- Opening dimensions 400 x 400 mm
- Inner frame with darkening and fly screen
- Easy to operate using the lever system (Heki Style) or handles (Heki S)
- Spoilers to minimise noise available as an accessory

### DOMETIC MINI HEKI STYLE

For motorhomes and caravans. This small roof light fits neatly into the roof opening for the standard size of 400 x 400 mm and provides maximum light. The opening angle is determined by the hand-lever system.

- Inner frame with darkening and fly screen (can be adjusted separately)
- Available with or without forced ventilation
- Maximum opening angle: 50°
- Double acrylic glazing
- Three positions
- For roof thicknesses of 25 to 60 mm

With forced ventilation, roof thickness 25 to 42 mm / Ref. No. 9104116244  
 With forced ventilation, roof thickness 43 to 60 mm / Ref. No. 9104116245  
 Without forced ventilation, roof thickness 25 to 42 mm  
 Ref. No. 9104116242  
 Without forced ventilation, roof thickness 43 to 60 mm  
 Ref. No. 9104116243

### DOMETIC MINI HEKI S

For caravans. Small roof light, great effect: Mini Heki S is designed for standard roof openings (400 x 400 mm) and is easy to open thanks to its handles.

- Inner frame with darkening and fly screen (can be adjusted separately)
- Easy to use with handles
- Forced ventilation
- Maximum adjustable height: approx. 80 mm
- Five positions
- Single acrylic glazing

For roof thicknesses of 23 to 60 mm  
 Roof thickness 25 to 42 mm / Ref. No. 9104100289  
 Roof thickness 43 to 60 mm / Ref. No. 9104100290
